DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it includes legal phraseology (i.e., "comprising" and "said.") Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

- 2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
 - A person shall be entitled to a patent unless -
 - (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Crooks et al (Crooks hereinafter, US PAT: 5,930,773).

Re claim 1. Crooks discloses a utility resource transaction and management method accessible by a plurality of users over a computer network comprising: defining a database in a host computer having a processor and an interface device (see fig.5 element 200), storing in said database information pertaining to a plurality of utility resources (see col.4 lines 29-40); providing at least one customer with access to said database information pertaining to a plurality of utility resources (see col.4 lines 19-24, also see col.5 lines 1-10, see col.9 lines 15-25); receiving into said host computer information pertaining to an exchange of said utility resources from at least one consumer (i.e., resource usage information is received into host computer......, see col.7 lines 10-30); calculating a plurality of exchange constraints based upon said

Application/Control Number: 10/077,611

Art Unit: 3628

information pertaining to an exchange of said utility resources (i.e., tolerance parameters are preferably calculated through utilization of the billing information for each resource provider, see col.4 lines 65-67); establishing an exchange correspondence between said at least one consumer and said utility resource based upon at least one exchange constraint; and providing an computer accessible exchange report (see fig.11 element 122).

Re claims 2-5. Crooks further discloses the utility resource transaction and management method wherein said utility resource comprises electrical power, natural gas, water, and sewer services (see fig.16 B).

Re claims 6 and 7. Crooks further discloses the utility resource transaction and management method, wherein said computer network comprises a WAN (see col.5 line 55 – col.6 line 15).

Re claims 8-13. Crooks further discloses the utility resource transaction and management method of claim 1, wherein said receiving into said host computer information pertaining to an exchange of said utility resources comprises receiving information pertaining to a plurality of variables concerning said utility resources (i.e., resource usage information from resource provider 32 is received into host computer 22. The resource usage information pertains to consumption of at least one resource by the customer. The resource usage information can be introduced into system 20 in any suitable way. In one embodiment, such information from resource provider 32 is received electronically, via a suitable data link with host computer 20, using one or more of the Internet protocols mentioned above. Alternately, resource usage

Application/Control Number: 10/077,611

Art Unit: 3628

information can be received in hard-copy form and entered into the host computer as by manual data entry. Other methods and systems can, of course, be utilized to permit such information to be received by host computer 20. In a preferred implementation, the resource usage information which is received into the host computer pertains to a plurality of different consumption variables of the resource by the consumer. For example, one such consumption variable can be a cost-related consumption variable associated with the cost of a particular resource consumed by a consumer. Another consumption variable is a quantity-related consumption variable which is related to a quantity of a particular resource consumed by a consumer, see col.7 lines10-50)

Re claim 14. Crooks further discloses the utility resource transaction and management method, wherein said providing a computer accessible exchange report comprises providing said computer-viewable data through a GUI (i.e., click the display button, fig.11, also see col.13 lines 10-65)

Re claims 15 and 16. Crooks further discloses the utility resource transaction and management method, wherein said GUI comprises a plurality of variable user defined display reports (see fig.11 and fig.12, also see col.11 lines 45-65).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to OJO O. OYEBISI whose telephone number is (571) 272-8298. The examiner can normally be reached on 8:30A.M-5:30P.M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, HYUNG S. SOUGH can be reached on (571)272-6799. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
